

RADIO KERRY CASE STUDY

THE SITUATION:

Radio Kerry broadcasts 24 hours a day with a mix of music and talk programmes. The station provides local & national news, current affairs and sports coverage along with a variety of music programmes. They manage a network of broadcasting sites along with 7 studios across 2 sites and a staff of approximately 50 people. Radio Kerry wanted to achieve the following:

- A full cyber review of their current IT network to create a baseline of the current security topology
- An understanding of where their strengths and weaknesses currently are
- To assess opportunities for improvement and provide a proactive roadmap on cyber security
- Increase Cyber Security awareness for the business and team members
- Take a risk-based approach to cyber security and incident management

THE CLIENT'S WORDS:

“Michael and the team at NexGen Cyber worked with us through the whole process and provided a comprehensive report that highlighted our strengths and areas for improvement.”

Trevor Galvin
Engineering and IT Manager, Radio Kerry

HOW DID WE HELP?

NexGen Cyber carried out an extensive cybersecurity review and security assessment of Radio Kerry's environment:

- Evaluate the current security posture of the IT environment
- A detailed Cyber resilience assessment was completed with Trevor Galvin, IT Manager
- A Comprehensive assessment of the organization's existing policies, systems, and infrastructure
- Implemented a user awareness and training program
- Vulnerability assessment of computing systems and networks
- A detailed report covering 14 key areas was provided showing areas of strength and highlighting opportunities for improvement and ways to improve the cybersecurity posture

By conducting a Cyber Resilience Assessment, NexGen Cyber assessed the current cybersecurity risk and produced a plan prioritizing opportunities for improvement.

This provided valuable insights into Radio Kerry's security status and actionable guidance for improving resilience against potential cyber threats.

At NexGen Cyber, we would LOVE to help you with your own cyber security and technology support. Get in touch with us at:
